PELIKAN ● TECHNOLOGIES™

PELIKAN SUN™

ELECTRONIC LANCING SYSTEM

CHANGE THE WAY YOU FEEL ABOUT TESTING

Finger-Friendly™ Testing

TAKE THE PAIN OUT OF TESTING

The Pelikan Sun electronic lancing system's patented technology provides precision lancing control that virtually eliminates pain — a primary reason people don't test as often as they should — and significantly reduces finger trauma.

Our Comfort Profile offers 30 different levels of depth control, allowing you to obtain an adequate amount of blood for testing with the lowest possible setting.

No to pain, Yes to convenience and safety

The Pelikan Sun uses a patented 50-lancet disk, ensuring you get a sterile, sharp lancet every time. Just pop in a new disk and you're ready to go. Never see or handle lancets again.

Don't you deserve it?

How low can you go?

The Pelikan Sun's revolutionary lancing smoothness and precision means

- Significant reduction of pain during lancing
- Bleeding that stops almost immediately
- Quick healing of lancing wounds
- Minimal residual bruising and sensitivity
- Fingers that heal over time

As your finger health improves, you may be able to decrease your depth setting, with noticeable improvement in how your fingers look and feel.

How low can YOU go?

PELIKANSUN™

Introducing Finger-Friendly Testing

You shouldn't have to choose between having healthy fingers and testing as often as you'd like.

In a recent study, 75% of people who used the Pelikan Sun lancing device reported healthier fingers, with fewer bruises, fewer scars and calluses, and improved finger sensation.

Pelikan Sun™ electronic lancing.

It will change the way you feel about testing.

It will change the way you feel, period.
